

JON COOPER

Old Greenwich, CT • 415.860.6238 • jon.cooper@gmail.com • [linkedin.com/in/joncooper3](https://www.linkedin.com/in/joncooper3).

"Player-coach" technology leader with 20+ years of experience architecting, scaling, and securing high-performance infrastructure in demanding financial environments. Proven success in leading teams through periods of intense growth and meeting escalating infrastructure demands. Directly responsible for driving a firm's 14x AUM growth by writing its core automated investment platform in Go/Python on Linux

SELECTED EXPERIENCE

FIRST REPUBLIC BANK (NOW JPMORGAN CHASE)

New York, NY and San Francisco, CA

Head of Marketing Technology & Analytics Strategy

05/2022 - 07/2024

- Recognized for cross-functional executive leadership by CMO and CEO and internally recruited to join them in transforming the marketing department of 200+ (\$100M+ opex) by uniting technology, data, and analytics
- Directly managed team of 50 (\$25M opex budget) that owned critical infrastructure: the bank's website, intranet, client-facing email systems, campaign orchestration and analytics, privacy and fair lending tools, client communications preferences
- Turned around and revitalized the team, identifying and rallying underutilized talent into leadership and redirecting underperformers; saved its "deeply in the red" portfolio of complex, time-sensitive, regulatorily exposed initiatives; cut \$10M+ run-rate while doing so
- Resolved acrimonious and counterproductive dynamics between marketing, data, IT, digital channels, and compliance departments, ultimately achieving a true partnership with aligned roadmaps and matrixed teams, as well as individual and collective buy-in among department heads and their leadership teams
- Moved to JPMorgan Chase on retention contract in 07/2023 as technical SME; hands-on-keyboard technical lead in the data/analytics related aspects of ensuring that the many client communications were correctly done, under intense time pressure and regulatory scrutiny

Head of Applied Analytics

12/2018 - 05/2022

- Recruited by deputy COO to lead federated analytics teams (modeled on Goldman's "strats") serving executive, and functional leadership during rapid growth to \$232B (30% CAGR)
- Built the bank's next-gen cloud analytics, data, and development environment by building, buying, deploying, and integrating best-in-class technologies including AWS, Snowflake, Beacon¹, dbt, Sigma, Alation, Fivetran
- Converged 10+ siloed analytics teams and 500+ users from local machines onto Beacon, offering them hosted VSCode, Jupyter notebooks, elastic DAG batch scheduling, container and task orchestration, lightweight GUI/data application frameworks, all on a shared Python monorepo and Docker registry
- Owned Beacon Platform with extensive hands-on enterprise architecture, DevOps/SRE, and development work; managed the deployment of the product (essentially a proprietary cluster with containerized runtimes and shared services, running on scale-out and scale-up AWS resources) into an air-gapped AWS VPC with enterprise security controls

¹ See <https://cwan.com/products/beacon/> for more information about the Beacon Platform

COLCHIS CAPITAL MANAGEMENT

San Francisco, CA

Chief Technical Officer

06/2013 - 09/2018

- Drove technology powering AUM growth from \$100M to \$1.4B AUM, personally architecting and coding our institutional grade high speed systematic investment system, dominating the peer-to-peer credit marketplace by achieving and sustaining 90% fill rates, purchasing 200,000 individual loans totaling >\$2B
- Wrote proprietary DSL and interpreter enabling credit team to write selection criteria in simple language, backtest it against replayed traffic, validate its correctness, and then deploy to our colocated environment for high speed execution (<50ms P99 end-to-end)
- Built enterprise data and analytics infrastructure for credit teams: migrated analysts from desktop SAS and Box file sharing to server-based SAS with SQL Server data warehouse and Tableau frontend; personally architected, built, and operated underlying VMWare cluster with Nimble SAN and PCIe flash accelerator, delivering 40x performance improvement and reducing analyst task turnaround times from days to minutes
- Created “single pane of glass” web application unifying the live trading system, backtesting and verification, portfolio management dashboards, risk and scenario analytics, infrastructure monitoring into a centralized command center for the firm
- Created and ran cybersecurity and DR/BCP programs as CISO, including SEC liaison and investor due diligence

DEUTSCHE BANK / ARROWGRASS CAPITAL

New York, NY and London, UK

Head of US Convertible Proprietary Trading

06/2004 - 11/2004

- Ran \$5B convertible bond book backing high volume flow desk and capital markets team

Portfolio Manager, US & Japan

11/2004 - 07/2008

- Recruited to join global head of convertibles in a carve-out, relocating to London on 1 day's notice
- Ran multi-\$B convertible, capital structure, cross-asset arbitrage books (credit, equity, rates, vol)
- Wrote and relied on my own tools, e.g. for credit curve trading, debt vs equity, short-end basis, event arb, puttable/callable high-grade bond arbitrage

EDUCATION

NEW COLLEGE OF FLORIDA

B.A. Software/Social Context

- New College is Florida's public liberal arts honors college
- Faculty-backed bespoke major combining mathematics, software engineering, sociology

SUN MICROSYSTEMS (JAVASOFT)

Cupertino, CA and Chelmsford, MA

Intern and Co-Op Student

1996 - 2001

- 4 internships, one co-op semester on the team (initially of 25) that invented Java
- Wrote keynote demos for 12,000 attendee JavaOne conference
